

June 19, 1999

Dear Dr. Henney,

Please end the use of antibiotics to promote livestock growth when the same antibiotics are used to treat humans. We should not jeopardize the effectiveness of antibiotics essential for public health to fatten livestock.

Without such a ban, antibiotic resistance may well grow into a public health crisis, as the Centers for Disease Control and other public health organizations warn.

Thank you for your attention.

Sincerely,

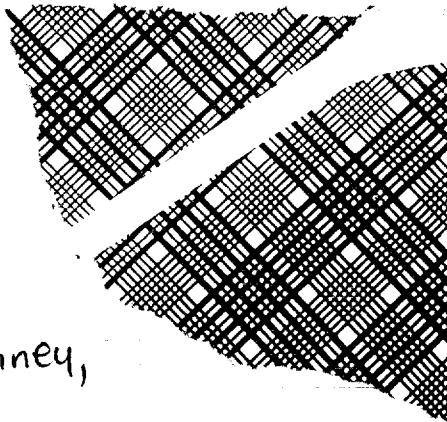

Anne Peterson
